

RA SOVANNA

Frontend Developer

SUMMARY

Junior Frontend Developer focused on React and TypeScript. Experienced in building real-world, single-page applications with clean UI, strong performance, and accessibility in mind. Developed finance and fintech-style dashboards with search, filtering, and state management. Eager to contribute to production-ready frontend teams.

EDUCATION

2022 – 2026 : **Bachelor of Business Information Technology** (Expected 2026)
ACLEDA University of Business – GPA: 3.6/4.0

2015 – 2020 : High School graduate at Hun Sen Balang High School.

TECHNICAL SKILLS

Frontend

- React, TypeScript, JavaScript, HTML, CSS, SASS
- Responsive design, accessibility, performance optimization

State & Data

- REST APIs, localStorage, basic state management

Tools

- Git, GitHub, VS Code, Chrome DevTools, Figma

Experience

Data Entry – Digital Divide Data Cambodia **2023 – present**

- Maintained high accuracy while working with structured datasets
- Collaborated with team members to meet productivity targets

Software Developer Intern – ACLEDA University of Business **Jan. 2024**

- Developed web features using HTML, CSS, Bootstrap, and JavaScript
- Built backend components with ASP.NET Core (MVC)
- Worked with SQL Server and Git version control

ACHEIVEMENT

1. Personal Finance Tracker (React, TypeScript)

- React + TypeScript SPA for tracking expenses.
- Real-time totals, category charts, filter/sort, dark mode, undo actions.
- LocalStorage persistence, SASS styling, smooth animations.
- [Live demo](#) | [GitHub](#)

2. Nexus Digital Wallet Dashboard – Personal Fintech Project

- Responsive React + TypeScript fintech dashboard with ABA-inspired UI.
- Search, filter, sort, pagination, USD/KHR formatting, subtle animations.
- High performance and accessibility scores.
